[How To Format A Hard Drive For Mac And Pc](#)

That's because, the two platforms have their specific file systems by default: Windows uses NTFS, while Mac use HFS+ or APFS.

1. [format hard drive](#)
2. [format hard drive windows 10](#)
3. [format hard drive from bios](#)

Erasing a disk or volume permanently deletes all of its files Before continuing, make sure that you have a backup of any files that you want to keep.. Out of the box, Windows can't read or write to HFS+/APFS and Macs can't write to NTFS drives.. However, it could be a totally different story if you plan to do this between a Mac and a PC.

format hard drive
