This is one of the most absurd games of all time. You're a pair of legs... with slots to mount guns and shields and regen powerups. That said, it's the most absurd game. Ok, maybe not the MOST absurd game, but it's on the absird game list.

I was not compensated for this review. But if you want o compensate me, you may.. This is one of the most absurd games of all time. I was not compensated for this review. But if you want o compensate me, you may.. This game is the best game about giant legs that I have ever played! Once you have a clingy weapon which is enemy seeking in your inventory and a regenner which heals you, you can easily wait patiently for hours at the beginning of the game while you store up resources to annihilate the rest of the enemies in the game. Just remember that the clingy shots are useless on the 5th boss where you have to target the red postal flag at the top and the clingy shots will just end up healing it.

For achievement hunters out there like me this one is an easy enough 100% as long as you don't mind spending some time crushing puny mortals for awhile to get your stomp count up to 300.

When playing this game I could not help but be reminded of Duke's mighty foot from Duke Nukem 3D...

Despite my energy counter at the bottom of the screen being missing in action the game is exactly what you might expect it to be from watching the video. Enjoy!!!.
